Full-Stack Software Engineer / React / Next.js / TypeScript / Web and Mobile

WORK EXPERIENCE

OOMAMI Eats by NutriPair Inc.

Feb 2025 to Present

Full-Stack Engineer

React Native / Expo / TypeScript / Supabase / Sentry / PostHog

- Redesigned core engagement workflows, including the feed, post creation, comments, reactions, and collections.
- Architected the app-wide design system with semantic theming, a custom ThemeProvider, dual dark palettes, and an iOS 26 Liquid Glass navigation language.
- Shipped threaded comments, @mentions, deep links, and push notifications with moderation and social growth workflows.
- Extended Supabase migrations, row-level security, Edge Functions, and RPCs; resolved authentication and performance issues and added Sentry session replay and PostHog analytics.

AidDrop

Aug 2026 to Present

Mobile & Full-Stack Engineer (Contract)

React Native / Expo / TypeScript / React / Mapbox / Stripe / Better Auth

- Delivered the React Native and Expo iOS app with Mapbox disaster discovery, organization browsing, Apple Sign-In, Stripe donations, impact updates, and user profiles.
- Developed donor-facing React web experiences, including an interactive disaster map, organization directory and profiles, donation flow, and marketing narrative.
- Completed the signed six-week contract scope in a two-person team, shipped to TestFlight, and earned formal acceptance for every milestone.

OnlyLinks

Oct 2025 to Feb 2026

Full-Stack Engineer

Next.js / React / TypeScript / Tailwind CSS / tRPC / Supabase / Cloudflare

- Developed an interactive SaaS demo, audit log, admin dashboard, and publishing workflow for product trials and platform visibility.
- Implemented the Creator Media Kit with profiles, custom links, follower syncing, and OAuth 2.0 across five social platforms.

NutriPair

Oct 2024 to Jan 2025

Full-Stack Engineer

Next.js / React / TypeScript / Tailwind CSS / AWS / PostgreSQL

- Developed responsive React features, translated UI designs, integrated AWS REST APIs, and supported PostgreSQL data workflows.

Tramona

Nov 2023 to Jan 2024

Front-End Developer

- Translated Figma designs into responsive landing and host-facing React pages with reusable components.

Arcel Design

Aug 2023 to Oct 2023

Freelance Front-End Developer

- Launched a responsive Next.js client portfolio from requirements and Figma mockups through feedback and release.

PROJECTS

FindMyMatcha

Jul 2026 to Present

iOS and Web Discovery App

React Native / Expo / TypeScript / oRPC / Drizzle / Cloudflare D1 / Better Auth

- Own the iOS client and backing APIs and schema for a drink log, photo journal, taste profile, and social and location-ranked feeds.
- Established a tested design system with approximately 20 primitives; fixed mobile sessions and hardened Apple Sign-In. Private TestFlight beta.

Be Focused

Dec 2024 to Present

Full-Stack Productivity App

Next.js / React / TypeScript / Hono.js / PostgreSQL / Supabase

- Created Pomodoro, task-management, and ambient-sound workflows with persistent state and a typed REST API.

EDUCATION

University of California, Irvine

GPA 3.64 / Honors Program

B.S. Information & Computer Science

TECHNICAL SKILLS

- Languages:** TypeScript, JavaScript, SQL, HTML5, CSS3
- Frontend:** React, Next.js, React Native, Expo, TanStack Query, Tailwind CSS, Three.js, Figma
- Backend / Data:** Node.js, Hono, REST APIs, oRPC, tRPC, PostgreSQL, Supabase, Drizzle, Cloudflare D1, Zod, OAuth 2.0
- Cloud / Quality:** AWS, Cloudflare Workers, CI/CD, GitHub Actions, Sentry, Vitest, Playwright, Git, Claude Code, OpenAI Codex
